EDUCATION

NED University of Engineering & Technology

- B.S. in Computer Science – Specialization in Artificial Intelligence
- CGPA: 3.84

Karachi, Pakistan
Aug 2022 – Aug 2026

Bahria College Karsaz

- Intermediate in Computer Science
- Percentage: 86%

Karachi, Pakistan
Aug 2020 – Jul 2022

EXPERIENCE

AI Engineer

Intellexal Solutions

Jan 2026 – Present
Karachi, Pakistan

- Designed and implemented Retrieval-Augmented Generation (RAG) pipelines for a Communication-as-a-Service (CaaS) product to enhance contextual intelligence.
- Built a high-performance analytics dashboard on 40M+ live database records using FastAPI, React, and Docker.
- Designed and optimized OLAP-based analytical queries on high-volume datasets (40GB+), leveraging partitioning and indexing strategies to enhance performance and ensure efficient data retrieval under complex query workloads.

Data Science Intern

EvantageSoft

Feb 2025 – June 2025
Karachi, Pakistan

- Processed large-scale legal datasets to build domain-specific knowledge bases for RAG systems.
- Implemented Fusion RAG and Corrective RAG architectures to improve retrieval accuracy and reasoning.
- Built autonomous AI agents using LangGraph, CrewAI, and AutoGen to automate workflows.

PROJECTS

Real-Time Market Intelligence System for Smart Insights

Final Year Project

Ongoing
Python, Django, React, Agentic AI, NLP

- Building a real-time market intelligence system to analyze market data and deliver smart business insights.
- Integrating AI agents with Django backend, React frontend, and data visualization dashboards.

Traffic Monitoring and Congestion Prediction System

Machine Learning and Geospatial Analysis Project

June 2025
Python, React, LGBM Classifier, LIME, SHAP

- Built a model to predict traffic congestion using an LGBM Classifier with real-time weather and traffic data.
- Applied LIME and SHAP for model explainability and visualized congestion predictions via React dashboard.

Sign Language Conversion System

Machine Learning and Computer Vision Project

Nov 2024
Python, Flask, Mediapipe, OpenCV

- Developed a system converting sign language to text and vice versa with speech and voice input support.
- Trained single-hand and multi-hand Random Forest models on ~14K custom images across 20 words.

TECHNICAL SKILLS

Programming Languages: Python, C/C++, SQL, Prolog

Machine Learning & Deep Learning: Scikit-Learn, PyTorch, TensorFlow, Keras, OpenCV

Agentic AI Frameworks: Agno, CrewAI, AutoGEN, LangGraph, n8n

Data Analysis & Visualization: Pandas, Matplotlib, Seaborn

Web Development: Flask, Streamlit, React, HTML, CSS

Tools & Platforms: Git, GitHub, Kaggle

ACHIEVEMENTS

- Secured 1st position in the Koderz Kombat coding competition at NED University (Nov 2024).
- Advanced to Round 1 of Meta Hacker Cup 2023, placing in the top 30% globally (Sep 2023).
- Selected on the Merit List of Prime Minister's Youth Laptop Scheme 2025, Pakistan, awarded to high academic achievers nationwide (July 2025).
